

GLOBALSOLUTIONS

Sweet1neLIVE Project Extension, Change Order & Commercial Invoice

Supplemental scope to Project Sweet1ne - premium dining, drinks, live music, events, reservations and online commerce

Document reference	GS-SW1-CO-LIVE-2026-001
Version / status	v1.1 - FINAL EXECUTION COPY
Project	Project Sweet1ne - Sweet1neLIVE Extension
Parties / audience	GlobalSolutions and Sweet1ne
Issue date	17 August 2026
Relationship to main project	Additional workstream under the existing Project Sweet1ne contractual framework
Extension fee	GBP 400.00 fixed, plus approved third-party charges
Target delivery	5 weeks from authorised commencement, staged
Technical lead	Kelvin Kibiru - GlobalSolutions Lead Software Developer
Governing law	England and Wales

Extension status: This document adds Sweet1neLIVE to the existing Sweet1ne engagement. It does not replace the main Sweet1ne agreement, NDA, DPA or other executed governance documents except where this Change Order expressly varies them for the Sweet1neLIVE workstream.

ADDITIONAL EXTENSION VALUE: GBP 400.00 | Main Sweet1ne programme: GBP 2,500.00 | Aggregate contracted value after approval: GBP 2,900.00, excluding third-party charges and later Change Requests.

Commercial and project particulars

FIELD	AGREED PARTICULAR
Supplier	GlobalSolutions, Selwood Court, Dartford, DA1 1QL
Supplier representative	Louis Kisitu - Managing Director
Client	Sweet1ne
Client representative	Tolulope Babalola - Co-Founder
Extension	Sweet1neLIVE website and customer platform
Delivery model	GlobalSolutions retains contractual responsibility; delivery may be performed by Kelvin Kibiru and approved developers under GlobalSolutions supervision
Main contractual framework	Project Sweet1ne amended software agreement, Mutual NDA, DPA, international-transfer controls, developer undertakings and approved project plan
Payment methods	Bank transfer; USDT; USDC; or another stablecoin expressly approved by GlobalSolutions in writing
Invoice status	This signed Change Order functions as the commercial invoice and payment authority for the GBP 400 extension fee

1. Purpose, relationship to the original deal and authority

- 1.1** Sweet1ne appoints GlobalSolutions to deliver the Sweet1neLIVE extension described in this Change Order. Sweet1neLIVE is an additional workstream to the existing Project Sweet1ne engagement and is not a replacement for Version 1 or Version 2 of the main programme.
- 1.2** The existing Project Sweet1ne agreement, Mutual NDA, Data Processing Agreement (DPA), international-transfer controls and developer security obligations continue to apply to this extension. This Change Order varies the main agreement only to the extent required to add the Sweet1neLIVE scope, five-week delivery target and GBP 400 additional fee.
- 1.3** GlobalSolutions is the client-facing and legally responsible supplier. Kelvin Kibiru acts as GlobalSolutions Lead Software Developer and may coordinate approved developers. Sweet1ne has no separate contractual or payment obligation to any developer or delivery partner engaged by GlobalSolutions.
- 1.4** Where a provision of this Change Order conflicts with the main agreement in relation to Sweet1neLIVE, this Change Order prevails for that workstream. For data protection, confidentiality and security, the stricter applicable obligation remains controlling.
- 1.5** The source proposal supplied for Sweet1neLIVE is replaced for client-facing purposes by this GlobalSolutions document. No third-party developer or delivery brand is presented as the contracting supplier to Sweet1ne.

2. Product positioning and project objective

- 2.1** Sweet1neLIVE will be developed as a premium, mobile-first digital destination for Sweet1ne's evening dining, drinks, live music, events and venue-led experience. The platform is intended to remain recognisably part of the Sweet1ne ecosystem while presenting a deliberately more luxurious, entertainment-led and late-night customer experience.
- 2.2** The platform will combine high-impact visual storytelling with direct operational customer journeys for reservations, event discovery, paid ticketing, collection ordering, venue-hire enquiries and customer communications.
- 2.3** The objective is not simply to publish venue information. The platform should convert marketing and social-media traffic into measurable actions while giving authorised Sweet1ne staff direct control over bookings, events, menus and selected customer-facing content.

3. Core project objectives

- Establish a premium and distinctive online presence for Sweet1neLIVE.
- Showcase dining, drinks, jazz, live bands, live music and events through high-impact imagery, video and clear calls to action.
- Allow customers to reserve tables directly through a custom Sweet1neLIVE reservation journey.
- Allow customers to discover events and purchase tickets online for paid events.
- Allow customers to order eligible food items for collection and complete payment online.
- Generate qualified venue-hire enquiries through a dedicated customer journey.
- Provide an administration area for managing reservations, events, menus, ticketing and selected website content.
- Create a strong mobile destination for visitors arriving from social media, email and other marketing campaigns.
- Instrument the customer journeys for analytics so Sweet1ne can understand traffic, conversion and operational performance.

4. Customer-facing website scope

AREA	INCLUDED CAPABILITY
Home	High-impact introduction; featured food and drinks; upcoming events; live entertainment; reservations; ordering and venue-hire calls to action.
Menu	Food and drinks categories, descriptions, prices, imagery, dietary information where supplied and featured items.
Live & Events	Upcoming experiences, jazz/live-band information, promotional content and event discovery.
Smart Events Calendar	Date-based event browsing with upcoming and past event handling and links to event details.
Event Detail	Event artwork, date/time, description, performer information, booking and ticket-purchase actions.
Reservations	Direct Sweet1neLIVE reservation journey using the custom booking engine.
Order for Collection	Basket, collection details, Stripe checkout and confirmation.
Venue Hire	Venue presentation and structured enquiry journey for private or organised events.
Gallery / Experience	Visual presentation of the venue, food, drinks, music and atmosphere.
Contact / Visit	Opening information, location and agreed contact details.

5. Custom reservation and booking system

5.1 Sweet1neLIVE will include its own reservation engine rather than relying on SevenRooms or an embedded third-party booking widget, unless Sweet1ne later approves a Change Request to alter that approach.

- Customer selects date, preferred time and party size.
- System checks configured availability, capacity and booking rules.
- Customer provides agreed contact and reservation information.
- Reservation is recorded within the Sweet1neLIVE system.
- Customer receives an email confirmation.
- Authorised staff can view and manage reservations through the administration area.
- Booking states may include confirmed, cancelled and completed.
- Authorised administrators can configure relevant availability and booking rules.

Included: The custom reservation engine is part of the GBP 400 extension scope. Advanced graphical seating maps and seat-selection systems are excluded unless later approved.

6. Events, smart calendar and online ticketing

6.1 Events are a core Sweet1neLIVE function. The platform will include a smart calendar and dedicated event pages, with paid ticket sales enabled for events configured as ticketed experiences.

- Create, edit, publish and unpublish events.
- Store event dates, times, descriptions, artwork and performer information.
- Display events through an upcoming-events calendar and event detail pages.

- Enable paid tickets on selected events and allow customers to choose ticket quantity.
- Complete payment through the approved Stripe integration.
- Record successful ticket purchases and issue customer confirmation.
- Allow non-ticketed events to use reservation or information-only customer journeys.

7. Online collection ordering and Stripe payments

- 7.1** Eligible food items may be ordered for collection through the website using the agreed customer journey: Browse Menu -> Add Items -> Basket -> Collection Details -> Stripe Payment -> Confirmation.
- 7.2** Stripe is the proposed payment provider for both collection orders and paid event tickets. The integration will use a Stripe-supported payment flow designed so that GlobalSolutions and the Sweet1neLIVE application do not intentionally store raw card numbers or card security codes.
- 7.3** Stripe transaction fees, payment-provider charges, refunds, chargebacks, subscription costs and any other third-party usage fees are not included in the GBP 400 development fee and remain the responsibility of Sweet1ne under the relevant provider terms.
- 7.4** Sweet1ne is responsible for the merchant account, customer refund policy, product legality, age-related sales controls and other merchant obligations. GlobalSolutions will implement the approved technical journey and wording within the agreed scope.

8. Venue-hire enquiries

- 8.1** A dedicated venue-hire section will present Sweet1neLIVE as a bookable venue and capture structured enquiries for private, corporate or organised events.
- 8.2** The enquiry journey may collect name, email, telephone, event type, preferred date, estimated guest count, requirements and additional notes. Final fields and the enquiry recipient must be approved by Sweet1ne before launch.
- 8.3** Submissions will be routed to the agreed Sweet1ne contact or administrative workflow. Automated pricing, contractual booking acceptance or venue-deposit collection is excluded unless expressly added.

9. Administration and staff controls

MANAGEMENT AREA	INCLUDED FUNCTIONS
Reservations	View bookings, manage booking status, review details and configure relevant availability rules.
Events	Create/edit events, upload artwork, set dates/times, publish/unpublish and manage event information.
Tickets	Set ticket price and availability for eligible events and review recorded purchases.
Menu	Manage items, descriptions, prices, categories, images, availability and featured items.
Website content	Manage selected high-change customer-facing content agreed during implementation.
Venue enquiries	Receive and review submitted venue-hire enquiries.

- 9.1** Role permissions will be configured so that authorised staff receive only the level of access reasonably required for their responsibilities. Administrator access and credential ownership will follow the governance principles already established under the main Project Sweet1ne engagement.

10. Design direction and brand standard

- 10.1** The design will be premium, dynamic and visually led while remaining clear, responsive and operationally usable. It will draw from Sweet1ne's established brand identity and client-supplied Sweet1neLIVE references, but the LIVE experience should have a distinct night-time and entertainment-led character.
- Luxury and exclusivity.
 - Night-time atmosphere and energy.
 - High-quality food and premium drinks.
 - Jazz, live music and social experience.
 - Strong photography and video.
 - Elegant motion and transitions.
 - Clear calls to reserve, buy tickets, order or enquire.
 - Mobile-first optimisation for social-media traffic.

10.2 GlobalSolutions will provide up to three consolidated rounds of design-related revisions within the agreed Sweet1neLIVE scope. A revision is an adjustment to an agreed design or implementation; materially new page types, integrations, workflows or functionality are Change Requests.

11. Client inputs and hard dependencies

11.1 The five-week target assumes that Sweet1ne provides the following information, assets, approvals and access without material delay:

- Approved Sweet1neLIVE branding and design references.
- Food, drinks, venue, event and performer imagery/video.
- Current menu information and prices.
- Initial event information, ticket pricing and event artwork.
- Opening hours, location and contact details.
- Venue-hire information and the authorised enquiry recipient.
- Sweet1ne-owned Stripe account/configuration access required for integration.
- Domain/DNS access where required.
- Approved privacy, cookie, alcohol/age and other customer-facing legal wording.
- Consolidated feedback and timely stage approvals.

11.2 A client dependency delay extends the relevant delivery date by at least the equivalent period and may require resequencing. GlobalSolutions is not in breach for delay caused by missing content, access, third-party approvals, changed instructions or unavailable provider services.

12. Delivery plan - five-week extension workstream

STAGE	TARGET	PRIMARY DELIVERABLES
Stage 1 - Experience & Foundation	Weeks 1-2	Discovery; information architecture; visual direction; responsive website foundation; homepage; menu presentation; Live & Events; smart calendar; event pages; gallery; venue-hire journey; core content population.
Stage 2 - Booking, Ticketing & Commerce	Weeks 3-4	Custom reservation engine; booking management; collection ordering; basket/checkout; Stripe integration; online event ticket sales; confirmations; core administration functions.
Stage 3 - QA, Launch & Handover	Week 5	End-to-end testing; responsive/browser QA; booking and payment testing; security/performance hardening; production deployment; final refinements; technical handover.

12.1 The five-week period begins when this Change Order is approved, the commencement payment is received and the minimum Stage 1 dependencies are available.

12.2 Sweet1neLIVE is an extension workstream. If Sweet1ne directs GlobalSolutions to prioritise it ahead of existing Sweet1ne milestones, GlobalSolutions may issue an integrated delivery schedule identifying any resulting movement to the main programme. Such agreed resequencing is not treated as delivery failure.

13. Deliverables and acceptance criteria

- Bespoke Sweet1neLIVE responsive website and UI/UX design.
- Premium homepage and agreed customer-facing content pages.
- Food and drinks menu experience.
- Smart events calendar and event detail pages.
- Custom Sweet1neLIVE reservation engine and reservation administration.
- Online event ticket sales.
- Stripe integration for paid tickets and eligible collection orders.
- Collection ordering and checkout.
- Venue-hire enquiry experience.
- Administration for events, menu, ticketing and selected website content.
- Email confirmations for relevant booking and transaction journeys.
- Analytics integration within the agreed measurement architecture.
- Responsive and modern-browser testing.
- Production deployment and technical handover.

13.1 Each submitted stage should be reviewed within five Business Days. A rejection must identify a material failure against an agreed requirement. If Sweet1ne does not provide a written, itemised rejection within that review period, the stage may be treated as accepted for progression purposes.

13.2 Minor defects that do not prevent operational use do not block acceptance and will be addressed during QA or the applicable post-launch support period.

13.3 Final acceptance requires the agreed functionality to be delivered, critical defects resolved, production deployment completed and the agreed handover materials made ready.

14. Data protection, privacy, analytics and customer communications

14.1 Sweet1ne remains Data Controller and GlobalSolutions remains Data Processor for personal data processed through Sweet1neLIVE. The existing Project Sweet1ne DPA applies to the extension and is supplemented by the additional processing particulars in Schedule B below.

14.2 Before live collection begins, Sweet1ne will approve and publish privacy and cookie/tracking information that covers the Sweet1neLIVE journeys. GlobalSolutions will implement approved controls within the technical scope.

14.3 Where analytics, marketing tags or other non-essential storage/access technologies are deployed, they must be configured in accordance with the approved consent-management approach. Customer marketing is not automatically authorised merely because a person reserves, orders or purchases a ticket.

14.4 Developer access from Kenya remains governed by the existing international-transfer and remote-access controls. No new developer or provider may receive personal-data access merely because this extension has been approved.

14.5 Payment-card data is intended to be handled by Stripe-supported payment components. Sweet1neLIVE may retain order, ticket, payment-status and transaction-reference information required for fulfilment, reconciliation and support, but not raw card details as part of the agreed application design.

15. Deployment, handover and post-launch support

15.1 GlobalSolutions will support deployment to the agreed production environment, including reasonable configuration, launch checks and handover guidance.

15.2 On full payment of the Sweet1neLIVE extension fee and other undisputed amounts due, project-specific source code, administrator credentials under GlobalSolutions control and reasonable technical handover materials will be provided in accordance with the intellectual-property framework of the main agreement.

15.3 The main agreement's 60-calendar-day post-launch support framework applies to Sweet1neLIVE from its production go-live date. Included support covers reproducible defects and material errors attributable to the delivered code; it does not include new features, redesign, ongoing content management, third-party outages or 24/7 infrastructure management.

16. Scope boundaries

16.1 The following are excluded unless separately approved in writing:

- Native iOS or Android applications.
- POS or delivery-platform integration.
- Advanced reserved seating maps or seat-selection systems.
- Ticket resale marketplace or dedicated ticket-scanning mobile application.
- Delivery-driver or logistics management.
- Loyalty programme or complex promotions.
- Professional photography or videography production.
- Paid advertising management.
- Ongoing content management after handover.
- Third-party subscription, transaction, hosting or usage charges.
- 24/7 infrastructure management or operational support.

Expressly included: The custom reservation engine, Stripe payment integration, collection ordering and online event ticket sales described in this Change Order are included in the GBP 400 development fee.

17. Commercial proposal, invoice status and payment

EXTENSION FEE: GBP 400.00 FIXED | This fee is additional to the existing GBP 2,500 Project Sweet1ne programme.

PAYMENT PHASE	TRIGGER	AMOUNT
Payment 1 - Project deposit	On approval / before Sweet1neLIVE commencement	GBP 150
Payment 2 - Stage 2 commencement	Following acceptance of Stage 1 deliverables	GBP 150

PAYMENT PHASE	TRIGGER	AMOUNT
Payment 3 - Final delivery	On completion of Stage 3, before final handover	GBP 100
TOTAL	Additional Sweet1neLIVE extension value	GBP 400

- 17.1** This signed Change Order functions as the master commercial invoice and payment authority for the Sweet1neLIVE extension. GlobalSolutions may issue short milestone payment notices containing verified payment instructions and due dates; those notices do not replace or vary this document.
- 17.2** Payments may be made by bank transfer, USDT, USDC or another stablecoin expressly approved in writing by GlobalSolutions, using the verification and GBP-equivalent principles in the main agreement.
- 17.3** The Client is responsible for bank, blockchain, foreign-exchange, network and intermediary fees so that GlobalSolutions receives the full amount due. Third-party project costs remain separate unless expressly included in writing.
- 17.4** GlobalSolutions may pause the extension workstream, deployment or handover while an undisputed extension payment is overdue. Any resulting delay extends the Sweet1neLIVE schedule accordingly.

18. Change management and programme interaction

- 18.1** This Change Order defines the Sweet1neLIVE baseline. Normal refinement of approved functionality is expected during design and development.
- 18.2** A request that introduces a materially new feature, integration, provider, workflow, page type or operational function outside this baseline will be assessed before implementation. Where it affects effort, cost or timing, GlobalSolutions will issue a written Change Request for approval.
- 18.3** No informal instruction from a developer, supplier, agency, chat message or meeting changes the legal scope or payment obligations unless authorised by GlobalSolutions and Sweet1ne in accordance with the main agreement.

19. Success criteria

- The website clearly communicates Sweet1neLIVE as a premium food, drinks, live-music and events destination.
 - Customers can discover events and complete online ticket purchases.
 - Customers can make and receive confirmation of table reservations directly through Sweet1neLIVE.
 - Customers can place and pay for eligible collection orders online.
 - Customers can submit venue-hire enquiries.
 - Authorised staff can manage the agreed booking, event, menu and customer-facing operational functions.
 - The experience performs effectively on mobile and modern desktop browsers.
 - The platform provides a strong destination for Sweet1neLIVE marketing and social-media traffic.
- 19.1** These criteria define functional and experience targets. GlobalSolutions does not guarantee a particular number of bookings, ticket sales, orders, enquiries, revenue uplift or marketing conversion rate.

20. Continuation of the main agreement

- 20.1** Except as expressly varied by this Change Order, the warranties, intellectual-property provisions, confidentiality obligations, data-protection framework, liability limitations, termination provisions, notice provisions, governing law and dispute terms of the main Project Sweet1ne agreement continue unchanged and apply to Sweet1neLIVE.
- 20.2** Approval of this Change Order does not cancel, replace or novate the main Project Sweet1ne engagement. It adds the Sweet1neLIVE workstream and its specific commercial and operational terms.

Schedule A - Invoice and extension payment record

Invoice / Change Order reference	GS-SW1-CO-LIVE-2026-001
Invoice / issue date	17 August 2026
Supplier	GlobalSolutions - Selwood Court, Dartford, DA1 1QL
Description	Design, development, testing, deployment and handover of the Sweet1neLIVE extension described in this Change Order
Extension subtotal	GBP 400.00
VAT	As stated in the main GlobalSolutions invoice record / subject to confirmed VAT status
Total extension value	GBP 400.00
Payment terms	GBP 150 commencement; GBP 150 after Stage 1; GBP 100 at final delivery before handover

Schedule B - Additional personal-data processing particulars for Sweet1neLIVE

DPA relationship: This schedule supplements, rather than replaces, the existing GlobalSolutions-Sweet1ne Data Processing Agreement.

CATEGORY	SWEET1NELIVE PROCESSING PARTICULARS
Data subjects	Website visitors; reservation customers; event attendees/ticket purchasers; collection-order customers; venue-hire enquirers; authorised Sweet1ne staff.
Identity/contact data	Name, email address, telephone number and other contact details approved by Sweet1ne.
Reservation data	Requested date/time, party size, booking status and operational notes required for the reservation journey.
Ticket/event data	Event selected, ticket quantity, transaction reference, purchase status and customer confirmation data.
Collection-order data	Items ordered, collection information, order status, transaction reference and fulfilment information.
Venue-hire data	Event type, preferred date, estimated guest count, requirements and enquiry notes.
Technical/analytics data	IP/device/browser data, event analytics, referral/source data and consent choices where configured.
Potential sensitive data	Dietary or allergy information only where Sweet1ne expressly requires it and the collection is necessary, proportionate and covered by the approved privacy/data framework.
Purposes	Reservations; ticket sales; collection fulfilment; confirmations; venue enquiries; administration; analytics; troubleshooting; fraud/security support; legal/compliance obligations as instructed by Sweet1ne.
Payment data boundary	Stripe handles payment-card entry through the approved payment flow; the application should retain only necessary payment status/transaction identifiers and related order or ticket records.
Retention	Subject to Sweet1ne's approved retention schedule and the existing DPA; no independent GlobalSolutions retention purpose is created by this extension.
International access	Any Kenyan developer access remains subject to the existing authorised-personnel, IDTA/transfer-assessment and security gates before personal-data access.

Schedule C - Execution

By signing: Each party confirms that it has authority to approve this extension, accepts the GBP 400 additional payment obligation, and agrees that Sweet1neLIVE is governed by this Change Order together with the existing Project Sweet1ne contractual and data-governance framework.

SIGNED FOR AND ON BEHALF OF GLOBALSOLUTIONS	SIGNED FOR AND ON BEHALF OF SWEET1NE
Signature: _____	Signature: _____
Name: Louis Kisitu	Name: Tolulope Babalola
Title: Managing Director	Title: Co-Founder
Date: _____	Date: _____

Execution checklist: Confirm VAT treatment; confirm bank/stablecoin payment details; confirm Stripe account ownership; approve Sweet1neLIVE privacy/cookie wording and final data fields before production collection; sign and date this Change Order.
